

Changing your TFS Hub Password

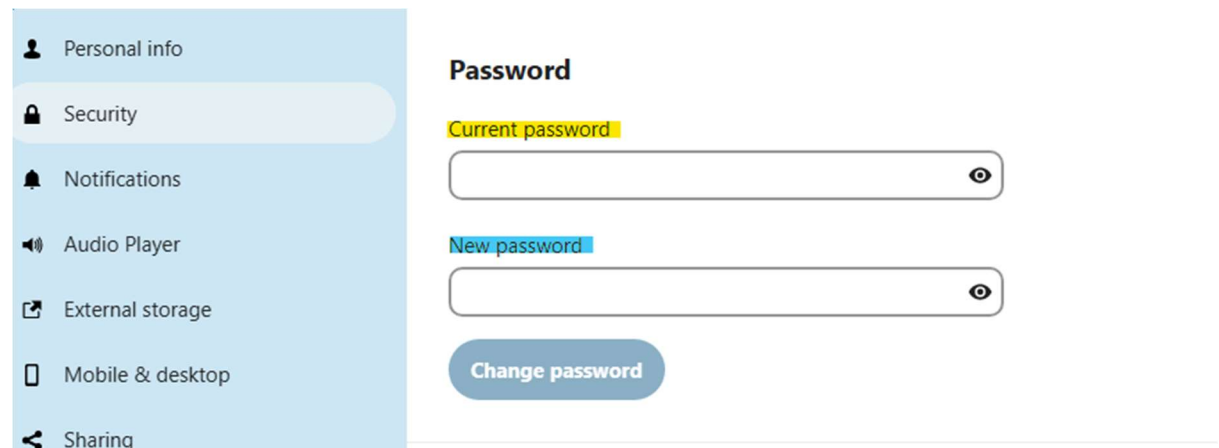

1. Click on your profile picture in the top right corner and select 'Settings'.

2. Click on 'Security' in the left-hand menu.

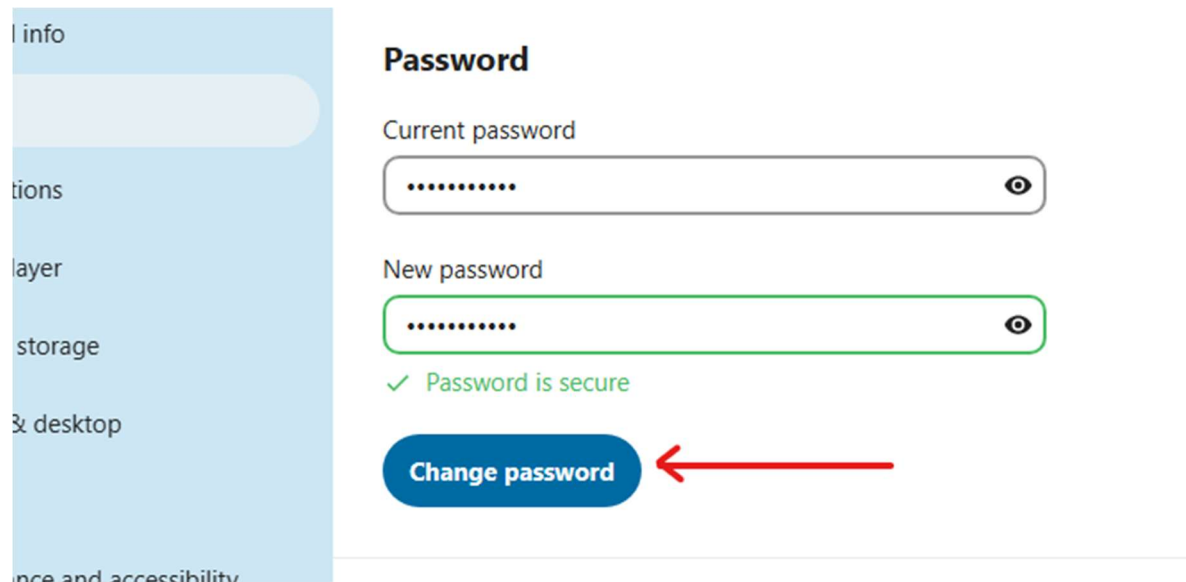

3. Enter your current password in the 'Current password' field, and then enter your desired new password in the 'New password' field.

The screenshot shows a settings application with a sidebar on the left containing the following menu items: Personal info, Security, Notifications, Audio Player, External storage, Mobile & desktop, and Sharing. The 'Security' item is highlighted. The main content area is titled 'Password' and contains two input fields: 'Current password' and 'New password'. Both fields are empty and have an eye icon on the right side. Below the fields is a blue button labeled 'Change password'.

4. Click the 'Change password' button.

This screenshot shows the same 'Change password' form as the previous one, but with the 'Current password' and 'New password' fields filled with dots. Below the 'New password' field, there is a green checkmark and the text 'Password is secure'. A red arrow points to the blue 'Change password' button.
